The curriculum for the ARDV program is designed to provide an intense exposure to the allied disciplines of architecture and real estate development. The degree-track minimizes the amount of time required to complete dual Masters degrees in architecture and real estate development.

**Total Credit Hours Required for ARDV Dual Degree 127**

\* The RDEV curriculum affords flexibility in course requirements and sequencing. Students work closely with an RDEV advisor to establish an approved program, which will be documented in an approved program form.

**APPLICANTS:**

Applicants to the Master of Architecture degree-track come from diverse educational backgrounds and from many locations worldwide. They often bring with them valuable insights based on their wide-ranging life and educational experiences. The admissions committee evaluates each candidate based on a portfolio of creative work (free-hand drawing, painting, sculpture and/or other examples of proficiency in the visual arts), transcripts, letters of recommendation, personal statement and Graduate Record Examination performance. The Master of Architecture curriculum depicted above is designed specifically for applicants who have had little or no coursework in architecture during their undergraduate educational experience.

**COURSE DESCRIPTIONS:**

A complete listing of course descriptions offered by the Architecture Program can be found at: <http://arch.umd.edu/arch/courses>

A complete listing of course descriptions offered by the Real Estate Development Program Program can be found at: <http://arch.umd.edu/rdev/courses>

**GRADE POINT AVERAGE IN MAJOR POLICY:**

The 3.0 GPA in major policy requires all graduate students matriculating in Fall 2012 to earn a 3.0 grade point average in their major, minor, and/or certificate requirements. With the new plus/minus policy, the minimum grade for most major courses is a B-, now calculated as a 2.7. It is important that graduate students clearly understand what courses make up major, minor and certificate requirements, and that the cumulative GPA for those courses must be at least 3.0.

**ACCREDITATION:**

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not by itself, recognized as an accredited degree.

The University of Maryland School of Architecture, Planning & Preservation offers the following NAAB-accredited degree programs:

M.Arch (pre-professional degree + 60 graduate credits)

M.Arch (non-pre-professional degree + 109 credits)

Next accreditation visit for both programs: 2017

Current information about the University of Maryland's Accreditation Status can be found at:

<http://arch.umd.edu/arch/naab-accreditation>

Additional information about NAAB can be found at: [www.naab.org](http://www.naab.org)
