

NATIONAL COMMUNITY SOLAR PARTNERSHIPS+

Community Solar

United States Department of Energy

OVERVIEW

The NCSP+ is a collection of stakeholders committed to supporting community solar, making it accessible in every U.S. household. The group focuses on equitable access, energy reliability and resilience, community-led economic development, and solar workforce opportunities.

COMMUNITY POWER ACCELERATOR

An online marketplace that creates a pipeline of credit-ready clean energy projects and connects the user to mission-aligned investors and organizations. The goal is to expand viable solar + storage projects.

Round 3 of the Community Power Accelerator Prize: Will award \$10 million in cash prizes to expand a ecosystem of developers that incorporate benefits into clean energy projects.

CONTACT NCSP+

Please send any questions and requests to:
community.solar@ee.doe.gov

www.energy.gov/communitysolar/about-national-community-solar-partnership

THE NATIONAL RENEWABLE ENERGY LABORATORY AND LAWRENCE BERKELEY NATIONAL LABORATORY

Funded by NCSP+ to provide technical assistance, resources, peer networks, and learning opportunities for community solar and rooftop solar + storage projects, commercial solar projects, and affordable housing and distributed solar + storage projects.
